PORTFOLIO

ge54dej.github.io

PROGRAMMING

Python · C++ · C · C# · Java
Arduino

ROBOTICS

ROS 2 · Franka Panda · UR10e
RoboDK · libfranka · SiLA 2

ENGINEERING

MATLAB/Simulink · KiCad
LTspice · Node-RED
Git · GitLab · Linux

LANGUAGES

Turkish — Native
German — Good
English — Advanced

Ege Palamutlu

M.Sc. student in Electrical Engineering at TU Munich, specialising in Automation & Robotics. Background in both hardware and software, with hands-on experience in robot control and embedded systems.

EDUCATION

- M.Sc. Electrical Engineering & Information Technology**
Technical University of Munich (TUM)

Apr 2024 – Present · 5th Semester

Focus: Automation & Robotics
- B.Sc. Electrical Engineering & Information Technology**
Technical University of Munich (TUM)

2019 – Mar 2024

Thesis: "Towards Automated Chemistry Research: Making Laboratory Devices Intelligent and Automation-Compatible"
Supervised by Prof. Dr.-Ing. Sami Haddadin · Advisor: Moritz Eckhoff · MIRMI

EXPERIENCE

- Working Student — Application Engineering**
PULS GmbH

Feb 2025 – Present

Testing and validation of industrial power supplies for customer use-case scenarios.
Designed and implemented a Node-RED-based test automation system using Pinebox IoT hardware.
- Working Student — Electronic Systems for Motor Control**
Knorr-Bremse

Jul 2023 – December 2024

Schematic capture and PCB layout for BLDC and stepper motor driver boards in KiCad.
Validated hardware designs using MATLAB/Simulink simulation prior to hardware bring-up.
- Engineering Internship — Robotics & System Intelligence Chair**
Technical University of Munich (TUM)

Dec 2022 – Mar 2023

Graph-based mechatronic system representation and optimization for the Hand Optimization Pipeline in MATLAB.
- Working Student — Engineering Department**
Linde Engineering

Mar 2022 – Jul 2022

Supported engineering department operations and technical documentation workflows.

PROJECTS

- Lab Automation with SiLA 2 — Bachelor Thesis**
TUM · MIRMI · Franka Panda · Python · C++ · SiLA 2

Sep – Dec 2023

Integrated a Franka Panda robot and Thermo Fisher Varioskan LUX plate reader via a SiLA 2 Server–Client architecture.
Implemented SiLA 2 Robot Server in C++ (libfranka) and clients in Python; full end-to-end automated experiment run.
- DrawBot & PolishBot — Whiteboard Robot**
RoboDK · UR10e · Franka Panda · ROS 2 · Python · C++

2024

Built a pipeline converting SVG files into drawing trajectories on a whiteboard using a UR10e arm in RoboDK.
Implemented automated erasing on the Franka Panda via hand-guided trajectory recording and impedance control.
- Tour I thento Picture — 3D Reconstruction**
MATLAB · TUM Computer Vision

2024

Reconstructed a 3D scene from a single 2D image.
- Robot Modelling and Identification**
MATLAB · Simulink · TUM Intelligent Machine Lab

2024

Developed and validated kinematic and dynamic models of robotic systems in MATLAB.
